Typescript

Docker
- 

**Inflection Point Systems**(May-2021 - Sep-2022)

**Fullstack Developer**

Develop web applications using React, Angular, node, Jest and agile methodologies, experience with AWS services and continous integration

Tools 

Angular

Nodejs

Slack

AWS amplify

Jest
- 

**Enviaflores.com**(Jul-2016 - May-2020)

**Frontend Developer & UI Designer**

Worked as Front Developer improving the design of the website (e-commerce) and its functionality, taking the business model into account. Developed web components using React and Vue.js, integrated with CakePHP. Cooperated in the global improvement of the site, with a redesign for better performance and visual improvements to the user experience of hundreds of clients who accessed the site daily.

Tools 

React

Vue
- 

**Adinfi**(Jun-2014 - Jun-2016)

**Java / Frontend Develeoper**

Worked in projects as a Java developer using Spring MVC. Also worked as Frontend Developer designing, developing modules and was responsible of other different tasks. Spent most of the time using jQuery and CSS/SASS. Usually had communication with clients to follow up on projects.

Tools 

Java

JQuery

Bootstrap

CSS / SASS
- 

**PRI Tamaulipas**(Jan-2011 - Jan-2014)

**Full Stack Developer**

Worked with Frontend/Backend developments and also the graphic design of the website. Was also the administrator of the organization's internal systems (PHP) and server databases (MySQL).

Tools 

PHP

MySQL
- 

**Lito Imagen**(Jan-2008 - Dec-2011)

**Designer & Web Developer**

Fully developed Lito Image´s main website (design and functionality), as well as the company´s microsites.

Tools
